HIGHTOWER'S VEGETABLE PLANTS

Hightowers vegetable plants are produced from the best seed, grown carefully and packed so as to reach you in the best shape. All orders are filled promptly if the weather is good. Bad weather conditions necessarily cause delay beyond our control, but generally the delays are very brief. IT PAYS TO BUY GOOD, HARDY, STRONG ROOTED PLANTS. OUR PLANTS WILL GIVE YOU A QUICKER AND BETTER CROP—NO C. O. D. SHIPMENTS OF PLANTS.

HIGHTOWER'S HARDY CABBAGE PLANTS

50, 25c; 100, 40c; 200, 75c; 300, \$1.00; 500, \$1.50; 1000, \$2.50; 2000, \$4.25, postpaid. Not prepaid, 1000 to 4000, \$2.00 per thousand; 5000 up, \$1.50 per thousand. Write for prices on large quantities.

FROSTPROOF CABBAGE PLANTS. Our Cabbage Plants are grown out in the open ground, are properly hardened off, and will ordinarily stand a temperature as low as 20 degrees. Under favoring weather conditions they will stand a temperature of down to 13 degrees. Frostproof plants of course do not mean "freeze-proof," or that they will stand a blizzard. When your plants reach you remove from the crate at once. If not to be planted immediately, wet the roots, and heel out in the ground, spreading the bunches as much as possible. If the plants should reach you with the outer leaves turned purple or yellow this does not mean at all that they are ruined. Cabbage plants are very hard to kill and are perfectly good as long as the bud is green.

VARIETIES: EARLY JERSEY WAKEFIELD; CHARLESTON WAKEFIELD; SUCCESSION; EARLY FLAT DUTCH.

GENUINE BERMUDA ONION PLANTS. Ready to pull and ship January 1st. Book your order ahead.
